REMARKS 25X1

25X1

1. Between 7 and 18 November 1951, there was no flying at Finstertwalde airfield. On 18 November, 28 aircraft were parked in front of the western hangars of the field. Additional aircraft were parked farther eastward. The hangars were empty.
2. During the period of observation, Finstertwalde-South, formerly Nehesdorf, and the northern edge of the airfield along Schackdorfer Chaussee were guarded. A newly erected Adcock DF station with four masts was observed just south of Finstertwalde-South in the extension of the runway. A wooden shed without windows which apparently belonged to the radio installation was located about 30 meters north of the radio installation. **

3. Between 3 and 18 November, no fuel arrived at the field.
